

## How are the British Values developed in Modern Foreign Languages?

Within Modern Foreign Languages, we foster respect for language and culture when exploring our chosen language of **Spanish**. As part of our successful bid for **Accreditation of the British Council's International School Award for 2022-2025**, we focussed on Spanish culture with our link school and had a Spanish week where many aspects of life in Spain were explored, including Catalan culture. For this academic year, our Mexican focus will develop the children's awareness of life in a Latin American country. The challenges of learning about the language and culture promote resilience.

Our ISA work has enabled us to raise the children's awareness of the many languages we share in our school. With the help of our Language Ambassadors, we have experienced traditional playground games, number systems, Christmas around the world and world foods.

Our Language Ambassadors put forward their own ideas for language and cultural activities in a democratic way and take responsibility for the tasks. We also regularly participate in Northampton Carnival and town Diwali celebrations.

As a result of our ERASMUS visits to Spain, Italy, Sweden and Iceland, we have broadened our experiences of Forest School and outdoor learning, mental health and the environment of the Early Years, all of which promote resilience and responsibility as well as mutual respect.
